LUXIA

EXPERIENCE

Rediscovering your connection with the sea aboard a Luxia yacht is an experience that goes beyond mere navigation; it is a **ritual of rebirth**, a **celebration of luxury and the bond with the ocean**.

Embarking on a Luxia yacht means embracing a journey of personal renewal and constant discovery. **The elegant shape of the hull**, with its flowing lines, seems designed to melt away stress and open the mind to the infinity of the sea. As the Luxia moves through the waves, its rising V-shaped form creates a sense of stability, offering passengers a safe haven.

LUXIA
YACHTS

375 GTS

Stepping aboard the **Luxia 375** means **immersing oneself in perfection**. With **nearly ten meters of pure luxury**, this yacht embodies uncompromising style, designed for those who seek excellence in every detail.

The Luxia 375 is a statement of elegance and versatility. **Crafted for extended navigation** and **to enjoy the sea even at night**, its **standard Hard Top** adds a touch of modernity and practicality, providing an unprecedented cruising experience.

The meticulous finish, the selection of **fine fabrics**, and the **exclusive interiors, enhanced by the artistic work of Ermenegildo Wilson**, create a unique environment. The Luxia 375 is an invitation to discover the sea in a new way, living every moment with unmistakable style.

Refined and sporty, the Luxia 375 is a journey into exclusivity, where every detail tells a story of luxury and uncompromising freedom. Designed for those who desire prolonged and indulgent navigation, this yacht redefines standards, offering the perfect blend of power and elegance.

HULL

EXTERIORS

The layout of the Luxia 375 yacht ensures **ample space** on board, both in the cockpit outside and in the cabin. The hull features generous volume while maintaining sleek waterlines. The beam and low center of gravity contribute to a **very stable attitude**, thanks in part to the gyroscopic stabilization system. The V-shape of the hull gradually increases from the stern to the bow, resulting in reduced exposure to the forces exerted by the sea currents and wind, enhancing course stability.

- **Stability.**
 - **Resistance to friction.**
 - **Excellent hull grip during turns.**
 - **Reduction in speed when crossing waves.**
 - **A diesel fuel tank with a capacity of approximately 800 liters ensures remarkable range at both displacement speed and full throttle.**
- Specifically, at maximum speed, the boat can travel 250 nautical miles at over 35 knots, which extends to more than 350 nautical miles at a cruising speed of 25 knots.

HARD TOP

EXTERIORS

The **Hard Top** of the Luxia 375 is the pinnacle of a design that seamlessly blends elegance and functionality, **redefining the concept of a rigid cover**. Imposing yet refined, the Hard Top is crafted with meticulous attention to detail, using **high-quality materials** such as fiberglass and other rigid and metallic components.

This sturdy roof is not just an aesthetic element — it offers a range of tangible benefits. Its solid structure provides **the perfect foundation for mounting heavy accessories like antennas and spotlights**, adding functionality without compromising style. The choice of premium materials not only enhances its remarkable aesthetics but also ensures **durability and resistance over time**, elevating the onboard experience of the Luxia 375.

In this perfect balance between form and function, the Hard Top becomes more than just a practical feature — it is an icon of style, pushing maritime luxury to new heights. This rigid roof is a true asset, not only for its versatility but also for its defining presence. With the Hard Top, Luxia redefines the concept of yacht coverings, transforming it into a **distinctive and functional element**, ready to cut through the waves with unmatched style and performance, all while providing shelter from the sun and the elements.

ON BOARD

AFT PLATFORM

EXTERIORS

Luxia Yachts offers the possibility of integrating two types of platforms on the stern: **fixed or mobile**.

The fixed platform features a 1.3-meter structure with a centrally integrated ladder for easy water access. Its size and structural omega system allow up to **three people to stand on it simultaneously**.

The mobile platform, or S.A.F.E., incorporates an up & down stern movement system with retractable steps. When lowered, these steps facilitate a smooth and comfortable transition into the water and back onto the boat. When raised, the platform makes boarding from the dock easier, ensuring safety and convenience.

Overall, the stern platform expands the walkable surface of the yacht, **offering a unique sense of freedom and movement**.

DECK

EXTERIORS

Luxia Yacht uses a wood of undisputed beauty, highly resistant to water and immune to insect attacks: **Teak**. The unique qualities of this tropical wood ensure maximum comfort of use in **all conditions and seasons of the year**.

Moreover, the material comes from responsibly managed forests, respecting nature, workers, and all regulations regarding the origin of the wood, including the **European Timber Regulation** and **FSC® certification**.

STERN BENCHES

EXTERIORS

The benches located at the stern of the boat can be used in various situations:

- **Closed with the high table:** Ideal for having meals comfortably.
- **Opened,** allowing for storage of materials: A useful space to keep items organized.
- **Completely open at the bow** to allow access to the engine room.
- **Closed with the lowered table** and the cushion area opened for sunbathing use.

SUNSHADE

EXTERIORS

This is an exceptionally smart shading solution designed specifically for **luxury yachts**. The **awning disappears completely**, thanks to **articulated arms** that retract into their **closed position**, becoming virtually invisible and preserving the vessel's sleek **aesthetic profile**.

When deployed, the arms of the **Rolling Sun Awning** extend to the desired position via an **electric mechanism**, then retract back into their housing when shade is no longer needed. The storage compartment is designed to be **extremely compact, minimizing space usage**.

The awning fabric is made of **micro-perforated** shade cloth, available in a wide range of colors to create the **perfect combination** for any yacht design.

EQUIPMENT

EXTERIORS

To meet the need for interaction between all the electronic devices on board, we have chosen to rely on **Garmin**.

The company supplies us with two types of 16-inch and 19-inch Chartplotters, with resolutions ranging from full HD to 4K.

- **High-quality IPS touchscreen display**, readable in sunlight from any angle.
- **Processing power up to 7 times faster** than previous generations.
- Gigabit speed on the **Garmin Bluenet™** network.
- Video integration with **HDCP** distribution.
- Display of sonar targets in ultra-high resolution.
- **Ability to add multiple Chartplotters**, sonar systems, and cameras to the network.
- Control the autopilot from any Chartplotter on the network.

EXTERNAL KITCHEN

EXTERIORS

Behind the helm seats, it's possible to set up a kitchen unit, with a **fiberglass frame** and an **internal wooden structure** that houses an 85-liter fridge, an icemaker, drawers for utensils and recycling, a sink, a chopping board for preparation, and a ceramic glass cooktop. The cover is made of heat-resistant material, **suited for outdoor use**.

AUDIO SYSTEM

EXTERIORS

Music is an integral part of the navigation experience. When you're offshore, you can alternate the calm of the sea with your favorite tracks by connecting your smartphone **to the high-quality Garmin Fusion audio system via AirPlay® technology.**

The speakers and amplifier installed on the Luxia 375 are specifically designed with materials tailored for the marine environment.

- **Customizable Audio Profiles.**
- **Audio Streaming with Garmin Wi-Fi Technology.**
- **Expand Your Music Choices with Fusion's PartyBus™ Network.**
- **4.3-inch Touchscreen Display**the yacht with reliable and fast Wi-Fi connectivity.

On board Luxia, the revolutionary **FUSION RA770** audio system is installed. Two years of research and development have led to the creation of the world's first stereo with integrated Wi-Fi, an anti-glare touchscreen, DSP amplification with profiling mode to optimize speaker sound based on the model and installation, an optical input for smart TVs, and PartyBus functionality, allowing you to play the same source in perfect sync throughout the boat by simply connecting your smartphone.

The speakers are specifically designed for marine environments — Fusion products are perfectly at home on the water and built to withstand the elements.

BOW CUSHIONS

EXTERIORS

The seating areas are made with **Linetex®** or **Batyline®** by SPRADLING®, a company that has been developing products for the marine industry since 1964. These fabrics are specifically designed, tested, and **certified to withstand the harshest conditions**, featuring stain resistance, waterproofing, UV protection, as well as resistance to mold and cold-induced cracking.

Compared to other yachts, the 375 features a bow cushion with the maximum size for the boat's dimensions. It can be made with **two different fabrics and fillings** and is perfect for enjoying the gentle rocking of the waves and the sun during a stop, or the wind while cruising.

LUXIA
YACHTS

OVERVIEW

INTERIORS

The interior of the Luxia 375 consists of a kitchen, a dinette area with a table that can be transformed into a double bed, a guest cabin, a bathroom, and a shower with separate entrances.

The paneling finish is made with **high-quality materials from the Italian company Cleaf**, known for their superior elements and the creation of stimulating spaces. The interior flooring can be **wood or have a concrete or stone effect**. The ceilings are divided into painted sections and panels covered in fabric or natural leather.

The windows are arranged across the entire bow area, they are large and equipped with sunshades. In the kitchen, bathroom, shower, and guest cabin, there is the possibility of integrating an opening for proper air circulation.

The Luxia 375 is equipped with **air conditioning**. The air conditioning can be controlled both below deck and externally thanks to the integrated Garmin system.

The audio system is independent from the external one and allows you to listen to different tracks without interference.

DINETTE

INTERIORS

The Dinette area is a perfect example of how space can be optimized and turned into a luxurious environment within a compact area. This space is designed to **maximize both efficiency and comfort**. It features **six seats**, each with its own storage compartment. The windows around the hull surrounding the area make it bright and panoramic, with the option to limit daylight and ensure privacy with **perimeter curtains**. On either side of the seating, **there are two speakers to fill the space with music**, and a **28-inch television** is installed on the bulkhead, connected to the internal network system. The **dinette table is foldable**, creating space for a comfortable double bed.

KITCHEN

INTERIORS

The interior kitchen benefits from a panoramic hull window, offering natural light and beautiful views. The cabinetry is seamlessly integrated with the **Silestone** countertop (composed of premium minerals and recycled materials) and the entrance panel. The sink is incorporated into the countertop, equipped with a **designer faucet** featuring a pull-out sprayer system. The kitchen is equipped with a sleek two-burner black **induction cooktop**, flush with the work surface. There is a 49-liter built-in refrigerator, a professional microwave oven from **Smeg** placed under the induction cooktop, and six drawers for ample storage space.

CUSHIONS

INTERIORS

The interiors of the Luxia 375 are upholstered with **Batyline** fabrics: an icon in the furniture market. Thanks to **Smart Yarn** technology – an exclusive patent of the company – the fabrics offer UV protection and resistance to fading. The fabrics have high resistance to UV rays, maintaining their color even when exposed to the sun, salt, and chlorine of harsh marine environments.

Mold and mildew will not develop on the fabrics; simply brushing off dirt and debris is enough to keep them clean. They can be cleaned with bleach without losing their vibrant colors.

The bedroom has an **independent access** with a wall-mounted door to the left of the descent below deck. **The walls are covered with laminate from the Cleaf company**, while the panels are unique in their kind. **The collaboration between Luxia and the artist Ermenegildo Nilson** led to the creation of an extraordinary work that dominates the front panel of the Luxia 375 bedroom.

MASTER CABIN

INTERIORS

In 2018, Ermenegildo opened his art studio, Arteria Palma, in the heart of the historic center of Ivrea, becoming a reference point for urban art in the region. His work goes beyond urban renewal, spanning from publishing to interior design, from sculpture to poster art.

This fusion between the mastery of Ermenegildo Nilson and the elegance of Luxia transforms the private space of the yacht. Ermenegildo's artwork is not just a decorative element, but a sensory journey that takes the occupants through a unique artistic experience. **Every detail**, every stroke **tells a story of creativity and refinement**, making the bedroom of the Luxia 375 an exclusive retreat enriched by contemporary art.

In this blend of Ermenegildo Nilson's visionary art and Luxia's timeless elegance, an experience aboard is created that goes beyond navigation, transforming into a **meeting between the sea and creativity**, between luxury and artistic expression.

Finally, **the room features two opening windows to enhance air circulation**, a bedside table, storage space, and two shelves with object fixtures, as well as a comfortable one-and-a-half bed.

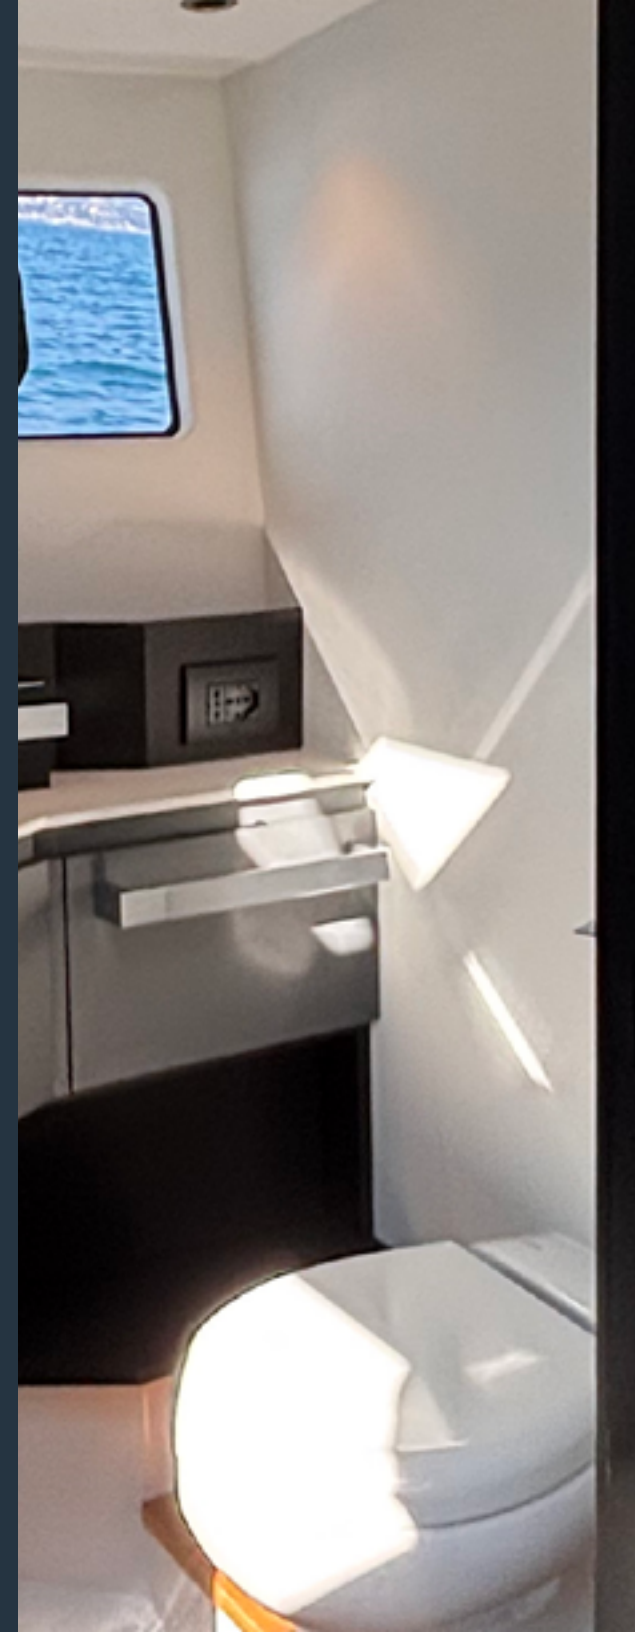

BATHROOM AND SHOWER

INTERIORS

The bathroom and shower have **two independent entrances**, allowing for greater privacy and are equipped with all possible comforts. The space is well-lit thanks to two opening windows and ceiling lights, with an additional light above the sink, placed laterally.

The sink and faucet are designed with a **Dekton countertop**. The doors and partition are made of glass, with curtains for the bathroom and a blackout for the shower. The cabinet offers ideal storage space to keep all personal hygiene essentials.

ANCHORING

The **Lewmar chromed winch** is a guarantee. Made of **stainless steel**, it features a new mechanism with larger shafts and gears. It is capable of preventing the accidental release of the 10 kg Delta anchor, which offers exceptional holding power on any seabed (including weeds). **It can quickly regain grip** when it tends to be dragged by the boat rotating around the anchorage point and increase its hold as the wind strengthens. The Delta is, in fact, the anchor with the best holding power relative to its weight and is lifetime guaranteed against breakage.

STANDARD EQUIPMENT

- Boat with glass side windows and windscreen
- Electrical system pre-configured for all optional equipment
- Outdoor galley unit with integrated fire suppression system and gas bottle compartment
- Interior and exterior lighting
- 2 electric table pedestals in the aft cockpit
- 1 electric table pedestal below deck
- 2 wooden tables
- Delta DTC anchor with 50 m galvanized steel chain and electric windlass
- 3 bilge pumps
- Fresh water pressure system
- Natural teak decking
- Interior and exterior countertops in Dekton with Lux faucets
- Bathroom countertop in Dekton with Lux faucets
- Folding aft benches with dual gas struts
- Interior refrigerator – 49 liters
- Exterior refrigerator – 100 liters
- 6 mooring cleats (length 240 mm – GHOST type)
- 4 push-button retractable fender holders
- 8 AGM service batteries 12V 100Ah and 2 engine start batteries 12V 100Ah
- Garmin Base electronics package with 1x16” display
- 2 custom Elegance helm seats

HULL, DECK & HARD TOP FINISH

- Gelcoat (with or without hard top)

ENGINE OPTIONS

- 2 Outboard engines up to 1000 Hp total
- 2 Inboard-outboard engines up to 800 Hp total

CUSHIONS & FABRICS

- Spradling Linetex upholstery

TANKS

- Fuel tank (gasoline/diesel): 800 liters

- Fresh water tank: 450 liters
- Grey water tanks: 60 + 8 liters
- Black water tank: 100 liters

OPTIONAL

ELECTRONIC INSTRUMENTATION AND MONITORS

- Garmin Base 2x16 inches
- Garmin Full 2x19 inches FULL
- Garmin B60 Depth Sounder
- Garmin Panoptix Front View
- TD50 Cabin Monitor
- SRX 400 Cabin Radio

HULL, DECK AND HARD TOP FINISH (with or without)

- Two-tone double layer paint

MANEUVERING

- Bow thruster

STABILIZER

- Seakeeper 2.0

SUPPLEMENTARY POWER SUPPLY

- 6KW Generator

PLATFORM

- Fixed platform for outboard motors
- Fixed platform 1.35 meters
- Mobile platform

SUNSHADE

- Sunshade top with carbon poles + canvas
- Electric automatic sunshade top (only with Hard Top)

AIR CONDITIONING

- Webasto heat pump 13800 BTU

COOKING HOB

- 1 Induction cooking hob

- 2 Induction cooking hobs
- 1 Gas cooking hob
- 2 Gas cooking hobs

CUSHIONS AND FABRICS

- Cushions in Batyline with open cell

COMMAND SEATS

- 3 Custom Elegance seats

DIMENSIONS AND WEIGHT

Overall length	11,50 m / 37'6"
Hull length	9,99 m / 32'7"
Beam	3,48 m / 11'41"
Length at the waterline	9,27 m / 30'41"
Draft without appendages	0,55 m / 3'9"
Light displacement	8.000 kg / 17.637 lbs
Full load displacement	9.700 kg / 21.385 lbs
