LUXIA

EXPERIENCE

Rediscovering your connection with the sea aboard a Luxia yacht is an experience that goes beyond mere sailing; it is a **ritual of rebirth**, a **celebration of luxury**, and a deep **connection with the ocean**.

Embarking on a Luxia yacht means embracing a journey of personal renewal and continuous discovery. **The elegant shape of the hull**, with its sinuous lines, seems designed to dissolve stress and open the mind to the infinity of the sea. As the Luxia moves through the waves, its rising V-shaped form creates a sense of stability, offering passengers a safe haven.

MONACO

Boarding the **Luxia 375 Monaco** means immersing yourself in an **unparalleled experience**. With nearly **ten meters of pure refinement**, this yacht embodies perfection in a single aesthetic configuration. Designed for those who seek the extraordinary, the 375 Monaco exudes **uncompromising style**.

The 375 Monaco is a **statement of elegance**. **Conceived for both day cruising and as a tender** for larger vessels, every detail has been meticulously crafted. Its impeccable paintwork lends a sophisticated allure, while premium fabrics envelop the interior, and the artistic works of **Ermenegildo Wilson** elevate the ambiance to an even higher level of exclusivity.

On the Main Deck, **two kitchen units frame the helm station**, providing both functionality and the opportunity for owners to customize the space to fit their lifestyle. Steps lead to a versatile bow area, where the choice between the **signature AR cushioning** and flush **teak** decking with a glass hatch enhances the sense of freedom — **a bespoke vision of luxury**.

The Luxia 375 Monaco is an invitation to rediscover the sea in a new way, to embrace every moment with unmistakable style. Intriguing and distinctive, the **Luxia 375 Monaco is a journey into exclusivity**, where every detail tells a story of uncompromising luxury and freedom.

ON BOARD

The layout of the Luxia Monaco yacht ensures **generous onboard spaces**, both in the exterior cockpit and the cabin. The hull offers ample volume while maintaining sleek waterlines. The beam and low center of gravity contribute to **exceptional stability**, further enhanced by the gyroscopic stabilization system. The V-shaped hull gradually increases from stern to bow, reducing exposure to marine currents and wind forces, ultimately enhancing course stability.

- **Stability.**
- **Resistance to friction.**
- **Excellent hull grip during turns.**
- **Reduced speed impact when crossing waves.**
- **A diesel fuel tank with a capacity of approximately 800 liters** ensures remarkable range both at displacement speed and at full throttle. Specifically, at maximum speed, the yacht can cover 250 nautical miles at over 35 knots, extending to more than 350 nautical miles at a cruising speed of 25 knots.

AFT PLATFORM

EXTERIORS

Luxia Yacht offers the option of two types of platforms on the stern: **fixed or mobile.**

The fixed platform features a 1.3-meter structure with a centrally integrated ladder for easy access in and out of the water. Its size and structural omega system allow up to **three people to stand on it simultaneously.**

The mobile platform, or S.A.F.E., is equipped with an up-and-down stern movement system, with retractable steps that extend when the platform is lowered, enabling effortless entry into the water and a comfortable return onboard. When raised, the platform facilitates safe and easy boarding from the dock.

Overall, the stern platform expands the yacht's walkable surface, offering **a unique experience of freedom and movement.**

DECK

EXTERIORS

Luxia Yacht uses **teak**, a wood of undeniable beauty, extremely water-resistant and immune to insect damage. The unique qualities of this tropical wood ensure maximum comfort **in all conditions and seasons**. Additionally, the material is sourced from responsibly managed forests, respecting nature, workers, and all regulations on wood provenance, including the **European Timber Regulation** and **FSC® certification**.

EQUIPMENT

EXTERIORS

To meet the need for seamless interaction between all electronic devices on board, we have chosen to rely on **Garmin**.

The company supplies us with two types of chartplotters, available in 16-inch and 19-inch sizes, with resolutions ranging from Full HD to 4K.

- High-quality **IPS touchscreen**, readable in sunlight from any angle.
- **Processing power up to seven times faster** than previous generations.
- Gigabit-speed connectivity via the **Garmin Bluenet™** network.
- Video integration with **HDCP** distribution.
- Ultra-high-resolution sonar target display.
- **Capability to network multiple chartplotters**, sonars, and cameras.
- Control the autopilot from any chartplotter in the network.

AUDIO SYSTEM

EXTERIORS

Music is an integral part of the sailing experience. When you're offshore, you can switch from the tranquility of the sea to your favorite tracks by connecting your smartphone to the **high-quality Garmin Fusion audio system via AirPlay® technology**.

The speakers and amplifier included with the Luxia 375 are specifically designed with materials suited for the marine environment.

- Customizable audio profiles.
- Garmin Wi-Fi audio streaming technology.
- Expand your music choices with Fusion's PartyBus™ network.
- 4.3-inch touchscreen display.

On board Luxia, the revolutionary **FUSION RA770** audio system is installed. Two years of research and development have led to the creation of the world's first stereo with integrated Wi-Fi, an anti-glare touchscreen, DSP amplification with profiling mode to optimize speaker sound based on the model and installation, an optical input for smart TVs, and PartyBus functionality, allowing you to play the same source in perfect sync throughout the boat by simply connecting your smartphone.

The speakers are specifically designed for marine environments — Fusion products are perfectly at home on the water and built to withstand the elements.

AFT CUSHIONS

EXTERIORS

The seating areas are made with **Linetex®** or **Batyline®** by SPRADLING®, a company that has been developing products for the marine industry since 1964. These fabrics are specifically designed, tested, and **certified to withstand the harshest conditions**, featuring stain resistance, waterproofing, UV protection, as well as resistance to mold and cold-induced cracking.

Compared to other yachts, the Monaco features the largest possible bow cushioning for its size. It can be crafted with **two different fabric and padding options**, making it perfect for enjoying the gentle sway of the waves and the sun while at anchor or the refreshing breeze while cruising.

LUXIA
YACHTS

OVERVIEW

INTERIORS

The interior of the Luxia Monaco features a kitchen, a dinette area with a convertible table that transforms into a double bed, a guest cabin, a bathroom, and a separate shower with independent entrances.

The bulkhead finish is crafted from **premium materials by the Italian company Cleaf**, renowned for its high-quality elements and the creation of inspiring spaces. **The interior flooring can be made of wood or have a concrete or stone effect.** The ceilings are divided into painted sections and panels covered in fabric or natural leather.

The yacht's windows span the entire bow area, offering ample natural light and equipped with sunshades. Additionally, the kitchen, bathroom, shower, and guest cabin can be fitted with openings to ensure proper air circulation.

Luxia Monaco is equipped with **air conditioning**, which can be controlled both below deck and externally via the integrated Garmin system.

The audio system is independent from the exterior sound system, allowing different tracks to be played simultaneously without interference.

DINETTE

INTERIORS

The dinette area is a perfect example of how space can be optimized and elevated to luxury within a compact environment. Designed for **maximum efficiency and comfort**, it features **six seats** along with six storage compartments. Hull windows surrounding the area provide ample natural light and panoramic views, **while perimeter curtains allow for adjustable daylight control and privacy**. **Two speakers** positioned on either side of the seating area ensure immersive sound throughout the space, and a **28-inch TV**, mounted on the bulkhead, is integrated into the onboard network system. The **dinette table is foldable**, transforming the space into a comfortable double bed when needed.

KITCHEN

INTERIORS

The indoor galley features a **panoramic hull window**, enhancing both natural light and views. The cabinetry is seamlessly integrated with the **Silestone** countertop — crafted from premium minerals and recycled materials — and the entrance bulkhead. The sink, built into the countertop, includes a **designer mixer tap** with a pull-out spray system. The galley is equipped with a black flush-mounted two-burner induction cooktop, a 49-liter built-in refrigerator, and a professional **Smeg** microwave oven, positioned below the cooktop. Additionally, there are six spacious drawers for optimized storage.

UPHOLSTERY

INTERIORS

The interiors of the Luxia Monaco are upholstered with **Batyline** fabrics, an icon in the furniture market. Thanks to **Smart Yarn** technology — an exclusive patent of the company — it ensures **high resistance to water, UV rays, and extreme conditions**. The **Stamskin** waterproof fabrics are perfect for interior marine upholstery projects, offering **scratch-resistant properties**, refined weaving, a wide color range, and exceptional durability, which guarantees long-lasting cushioning for the seats.

The bedroom has **independent access** through a wall-mounted door to the left of the stairway leading below deck. **The walls are clad in Cleaf laminate**, while the panels are truly unique. The **collaboration between Luxia and the artist Ermenegildo Nilson** led to the creation of an extraordinary artwork that dominates the front panel of the bedroom in the Luxia Monaco.

MASTER CABIN

INTERIORS

In 2018, Ermenegildo opened his art studio, Arteria Palma, in the heart of Ivrea's historic center, becoming a point of reference for urban art in the region. His work spans beyond urban renewal, extending from publishing to interior design, sculpture to poster art.

This fusion of Ermenegildo Nilson's craftsmanship and Luxia's elegance transforms the private space of the yacht. Ermenegildo's artwork is not just a decorative element but a sensory journey that leads the occupants through a unique artistic experience. **Every detail, every stroke, tells a story of creativity and refinement,** making the Luxia Monaco's bedroom an exclusive retreat enriched by contemporary art.

In this blend of Ermenegildo Nilson's visionary art and Luxia's timeless elegance, a unique onboard experience is born — one that goes beyond sailing, **becoming an encounter between the sea and creativity,** between luxury and artistic expression.

Lastly, **the room features two openable windows to promote air circulation,** a nightstand, storage space, and two shelves for securing items, along with a comfortable single-and-a-half-size bed.

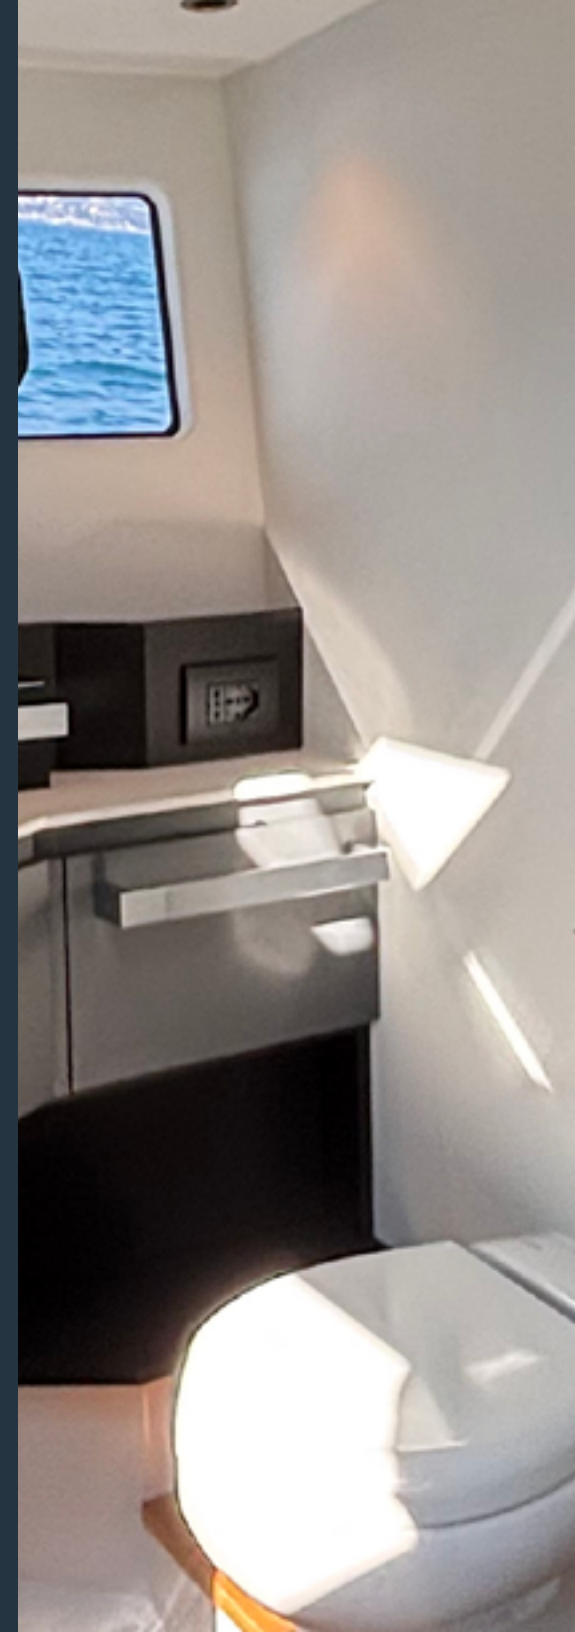

BATHROOM AND SHOWER

INTERIORS

The bathroom and shower have **two independent entrances**, ensuring greater privacy and providing all possible comforts. The space is well-lit thanks to two opening windows, ceiling lights, and an additional light positioned laterally above the sink.

The sink and faucet feature a sleek design with a **Dekton countertop**. The doors and partition are made of glass, with curtains for the bathroom and a blackout shade for the shower. The cabinet offers ample storage space, ideal for keeping all personal hygiene essentials neatly organized.

ANCHORING

The **Lewmar chrome-plated** winch is a guarantee of reliability. Made of **stainless steel**, it features a new mechanism with larger shafts and gears made of steel. It prevents the accidental release of the 10 kg Delta anchor, which offers exceptional holding power in any seabed (including weeds). **It can quickly regain grip** when it tends to slip due to the boat's rotation around the anchor point, and it increases its holding power as the wind strengthens. The Delta anchor is known for its superior holding power relative to its weight and comes with a lifetime warranty against breakage.

STANDARD EQUIPMENT

Boat with glass windows and windshield
Electrical system pre-installed for all optional equipment
Helm seat module with compartment for gas bottle and 16-liter freezer
Interior and exterior lighting
2 electric legs for aft table
1 electric leg for below-deck table
2 tables in wood or composite
3 wooden tables
Delta DTC anchor, 50 m galvanized chain, and windlass
3 bilge pumps
Pressure water pump (autoclave)
Natural teak decking
Interior galley countertops in Dekton with Lux faucets
Bathroom countertop in Dekton with Lux faucets
Foldable aft benches
Interior refrigerator 49 liters
6 mooring cleats 240 mm GHOST type
6 quick-release push-button fender holders
8 AGM service batteries 12V and 2 12V 100A starter batteries
Garmin Base 1x16-inch display

2 Custom Elegance helm seats

Hull, deck, and hard top finish (with or without)

Gelcoat finish

ENGINE OPTIONS

2 Outboard engines up to 1000 Hp total
2 Inboard-outboard engines up to 1000 Hp total

UPHOLSTERY AND FABRICS

Spradling Linetex upholstery

TANKS

Fuel tank (Petrol/Diesel) 800 liters
Fresh water tank 450 liters

Grey water tanks 60 + 8 liters
Black water tank 100 liters

OPTIONAL

ELECTRONIC INSTRUMENTATION & MONITORS

Garmin Base 2x16-inch displays
Garmin Full 2x19-inch FULL HD displays
Garmin B60 echo sounder
Garmin Panoptix FrontVü sonar
TD50 cabin monitor
SRX 400 cabin radio

HULL, DECK AND HARD TOP FINISH

Two- or three-layer dual-tone paint finish

MANEUVERING

Bow thruster

STABILIZATION

Seakeeper 2.0 gyro stabilizer

ADDITIONAL POWER SUPPLY

5kW generator

PLATFORM OPTIONS

Fixed platform for outboard engines
Fixed platform 1.35 m
Hydraulic moving/swim platform

SUNSHADE SYSTEMS

Carbon poles with canvas sunshade
Hard Top with stainless steel tubing and technical fabric cover

AIR CONDITIONING

Webasto 13,800 BTU heat pump

COOKTOP OPTIONS

1 Induction cooktop

UPHOLSTERY AND FABRICS

Batyline cushions with open-cell foam

HELM SEATING

3 Custom Elegance helm seats

DIMENSIONS AND WEIGHT

Overall length	11,50 m / 37'6"
Hull length	9,99 m / 32'7"
Beam	3,48 m / 11'41"
Length at the waterline	9,27 m / 30'41"
Draft without appendages	0,55 m / 3'9"
Light displacement	7.000 kg / 15.432 lbs
Full load displacement	8.500 kg / 18.739 lbs
